385 Park Avenue, Torrington, CT 06790

My primary skill is front-end web development, supplemented by a working knowledge of graphic design. I have excellent computer skills and I am highly adaptable. In my current role I routinely learn and implement new techniques to create marketing websites for all types of professionals and organizations.

Work Experience

Web Developer

PictureThis Webcenter, 2011 - Present

Torrington, CT

Description: As the primary web developer at PictureThis Webcenter I take static website mock-ups from a graphic designer and translate them into functional, mobile-ready websites. Once the website is built and approved, I am responsible for launching it, managing the domain name, and maintaining the site's hosting on a web server. I maintain over 40 sites for businesses and organizations throughout Northwestern Connecticut, often working directly with clients to add new information and keep the sites up to date. While building sites for PictureThis Webcenter I have worked with numerous technologies, from more traditional MySQL/PHP CMS systems to modern API services such as Mapbox and Stripe. I am familiar with modern web workflows and have a good understanding of the available tools.

Front-End Web Developer

Civiclifft, 2014 - 2017

Torrington, CT

Description: Civiclifft is a community engagement platform. As a front-end developer I focused on refining the appearance of the Civiclifft web service and engagement app, currently in development, ensuring that the programmed application matches the designer's specifications. Working on this project, I have gained some familiarity with React and Node.js single page application development.

Education

High School Diploma

Oliver Wolcott Technical High School, Class of 2010 - Graphics Department
Torrington, CT

Description: Focusing on pre-press production techniques, I developed graphic design and desktop publishing skills during high school, producing posters, business cards, letterhead, and brochures, I learned what is required to prepare professionally printed documents. My experience in web development starts in the OWTS graphics department computer lab, building websites for small businesses and school functions.
